

Golden Bond

Natural Beef Collagen Chews

Competitor Comparison: How It Stacks Up

ADULT 12 MOS+

Golden Bond is built around what matters most for a Golden Retriever over a lifetime: healthy joints. A large, athletic retriever puts real load on its hips and elbows every day. Golden Bond delivers single-ingredient beef collagen, the same structural protein found in cartilage and connective tissue, in a long-lasting chew that also supports dental health and coat shine. Here's how it compares to the most popular collagen and chew alternatives.

	Rosewood Golden Bond	Pawstruck Collagen Sticks	Typical Bully Stick	Traditional Rawhide
