

Golden Bond is a single-ingredient beef collagen chew made with the adult Golden Retriever in mind. Golden Retrievers are built for an active life, and a large, athletic retriever puts real load on its hips and elbows every day. Collagen is the same structural protein found in cartilage, tendons and connective tissue, and a long-lasting chew supports healthy joints, coat and teeth all at once. One ingredient. No fillers. No rawhide. Just good, simple nourishment for the breed we know best.

WHY THIS CHEW: WHY IT MATTERS FOR GOLDENS

Component	Why It Matters for Golden Retrievers
Beef Collagen (Corium)	The inner layer of beef skin, roughly 70% collagen. Collagen is the same structural protein found in a dog's own cartilage, tendons and connective tissue. For a breed that spends a lifetime running, swimming and retrieving, a whole-food source of collagen supports the tissues that work the hardest.
Naturally Occurring Glucosamine	Found naturally in collagen chews rather than added. Glucosamine supports healthy cartilage and joint fluid, a good fit for a large, athletic breed.
Naturally Occurring Chondroitin	Works alongside glucosamine to support healthy cartilage structure. Together they support the joints that carry a Golden through every field, lake and flight of stairs.
Collagen Amino Acids (Glycine, Proline)	The building blocks the body uses to maintain healthy connective tissue and skin elasticity, supporting the shiny coat and healthy skin Golden Retrievers are known for.
High Protein (~75%), Low Fat	Supports lean muscle and a healthy weight. That matters for a food-motivated breed, since extra pounds put added load on the joints.
Dense, Long-Lasting Chew Texture	Chewing helps keep teeth clean and supports dental health. It also gives a young Golden's energy a good outlet and steers chewing toward the right thing.
Single Ingredient, Rawhide Free	Collagen is highly digestible and won't splinter. For a Golden with a sensitive stomach, one ingredient means you always know exactly what your dog is eating.
No Added Calcium	Left out on purpose. A Golden on a complete diet already gets the minerals it needs, so we let collagen do its work without piling on extra calcium.

FEEDING GUIDELINES

Weight	Daily Amount	Notes
Under 25 lbs	Half stick/day	Introduce gradually over 3 to 5 days
25 to 50 lbs	1 stick/day	Most young adult Golden Retrievers
Over 50 lbs	1 stick/day	Standard for most adult Golden Retrievers (55 to 75 lbs)

GUARANTEED ANALYSIS

Crude Protein (min.)	75%
Crude Fat (min.)	0.25%
Crude Fiber (max.)	1%
Moisture (max.)	20%
Calorie Content ME	~85 Kcal/oz

PRODUCT PHOTO

WHY THIS CHEW FOR THIS LIFE STAGE

Life Stage	Age	Key Focus
Young Adult	1 to 3 yrs	Joint and cartilage support, coat health, an energy outlet
Prime Adult	3 to 6 yrs	Ongoing joint support, dental care
Mature Adult	6 to 7 yrs	Connective tissue and mobility support
Senior	7+ yrs	A gentle, digestible chew as joints and teeth get older

SOURCING & QUALITY

Single ingredient: USA beef corium
All natural, no chemicals or preservatives
Rawhide free, chemical-free processing
Highly digestible, won't splinter
Hand-inspected and packed by Rosewood Goldens

SAFETY & FEEDING

! Always supervise your dog while chewing.
Not suitable for puppies under 12 months.
Introduce gradually over 3 to 5 days.
Always provide fresh water.
Remove and discard small swallowable pieces.
Stop feeding if any reaction occurs.
Store in a cool, dry place.
