Golden Tide

Freeze-Dried Wild Salmon Cubes

Competitor Comparison: How It Stacks Up

ALL AGES

Golden Tide is built around the Golden Retriever's skin and coat. Goldens are known for sensitive skin, and marine omega-3s are some of the best-known nutrients for supporting healthy skin, a shiny coat and joint comfort. Golden Tide is pure wild-caught salmon, freeze-dried to keep those fragile omega-3s far better than heat processing. Here's how it compares to the most popular salmon and skin-and-coat treat alternatives.
